- **Issues addressed:** Behavioural problems, rule disagreements, parenting style differences.
- **Mutual understanding:** Helps parents and children see each other's perspectives.
- **Improved relationships:** Strengthens family bonds.
- **Conflict resolution:** Develops effective strategies for handling disputes.

Blended Families or Family dynamics

- **Blended family challenges:** Adjusting to new relationships and step-sibling dynamics.
- **Easing transitions:** Therapy at Trijog supports smooth family integration.
- **Encouraging bonding:** Strengthens connections between family members.
- **Setting boundaries:** Helps establish healthy family roles.
- **Addressing conflicts:** Resolves rivalry or discomfort.

PROCESS

At Trijog

Here's how the process works.

The session will be conducted by one of our Psychologist,
In your first session she will understand your present concerns
and also understand a detailed case history about you.

Post your first session the Psychologist will let you know:

- ➔ The number of sessions you would need further
- ➔ What would be the further line of action
- ➔ The frequency between sessions

If the session is held in person,
it will take place at one of our centres,
which are located in **Powai, Lower Parel, Bandra, and Khar.**
If it is conducted online, it will take place on **Google Meet.**

Duration of the session will be **50 Mins**

WHAT TO EXPECT

IN YOUR FIRST CONSULT

Your first mental health consultation is a crucial step in seeking support and improving your well-being.

It's natural to feel a bit confused or/and nervous, but knowing what to expect can help ease your anxiety.

Please find below a what to Expect in your First Consultation

- ✔ **Introduction & Explanation:** Therapist introduces themselves, explains their background, therapy process, and confidentiality.
- ✔ **History & Context:** Expect questions about personal, family, relationship, work, and mental health history, including physical health connections.
- ✔ **Establishing Goals:** Defining therapy objectives to align with your needs and expectations for effective progress.
- ✔ **Assessment of Well-being:** Discuss mood, thoughts, sleep patterns, habits, and lifestyle.
- ✔ **Therapeutic Approach:** Therapist explains their method (e.g., CBT, REBT Psycho-dynamic) and ensures it feels right for you.
- ✔ **Questions & Concerns:** Opportunity to ask about therapy methods, session frequency, or any other concerns.
- ✔ **Emotional Reactions:** Feeling emotional is normal; the therapist will help navigate strong feelings.
- ✔ **Ending the Session:** Summary of discussions, next steps, and a check-in on how you're feeling.

Frequently Asked Questions!

1

How will i feel after my first consultation?

After your first consultation, you might feel relieved, emotionally exhausted, hopeful, or uncertain. It's normal to experience a mix of emotions, and some people feel drained or overwhelmed after discussing personal topics. Overall, it's common to feel both curious about the process and unsure about what comes next.

4

How do you prepare for the first consultation?

To prepare for your first consultation, think about the reasons you're seeking therapy, any specific issues you'd like to address, and any questions you may have for the therapist. It can also help to gather relevant personal or medical information, like past mental health history.

2

What if i don't feel connected with the therapist?

If you don't feel connected with the therapist, it's okay to explore other options. A good therapeutic relationship is important for progress, so don't hesitate to discuss your feelings with the therapist or consider finding someone you feel more comfortable with.

5

How long will therapy last?

The duration of therapy varies depending on individual needs and goals. It can last anywhere from a few sessions to several months or even longer. Your therapist will work with you to determine the best approach and timeline.

3

Is counselling covered under insurance

Coverage varies depending on the provider and plan. It's best to check with your insurance company to confirm specific details about coverage, limits, and requirements.

6

Difference between psychologist and psychiatrist ?

A psychologist provides therapy and counseling, focusing on mental health through talk therapy. A psychiatrist is a medical doctor who can diagnose mental health conditions and prescribe medications. Psychiatrists may also provide therapy, but they often focus on medication management.

★★★★★ a year ago

Trijog is one of the few platforms in India that are doing it right with therapy. Absolutely love their process of selecting therapists based on the issues a person is wanting to address. I also love that the primary therapists rope in other speciality therapists if they feel that any issue in particular would get resolved better as a combination. I've been taking therapy with Trijog for close to a year now - with a combination of sessions from Dr Esha and Dr Mendhi. Both of them have been immensely helpful in my recovery. This is after I struggled to find the right fit of therapists from anywhere else for years. Will 100% recommend Trijog to anyone looking for therapy. Take that leap of faith. It's worth it! ❤️

Choosing therapy with Trijog is one of the best decisions I've made. I'm immensely grateful for Mini Ma'am's unwavering support. My heartfelt thanks for the transformative impact therapy with you has had on my life. Through our sessions, I've gained self-awareness, coping strategies, and a deeper understanding of myself. Your emphasis on self-care and quarterly check-ins has kept me aligned and balanced in various aspects of my life, including career, relationships, health, and more. I'm always looking forward to our next catch-up.

I had an incredible experience with Trijog—efficient, effective, and tailored. The process was user-friendly, but most importantly my therapist Mini Nair was an expert, adapting to my concerns & needs, all while being patient & understanding. I appreciated the ease of scheduling and diverse session options, thanks to Sushmita. I've recommended it to friends, and they've all reported positive experiences as well. Definitely recommend!

★★★★★ a week ago **NEW**

A truly wonderful place if you need any kind of help and guidance to deal with emotional issues, abusive relations or counselling. Arijita Sen is a wonderful person to talk to, she listens, understands and brings to light how our mind is working which in turn helps us understand harmful behaviour patterns and then guides us on how we need to address, modify or correct the same so we have a more happier, healthier life and relationships. Truly recommend this place to anyone who needs help or guidance of any sort. Though I do find it a little expensive.

I would highly recommend Trijog to anyone looking for guidance and support. I personally have referred a few friends, who are going through tough time and Trijog has been an absolute game changer. Therapist was very professional and yet empathetic to create a comfortable and safe environment that allowed genuine connection, personal growth and understanding.
